Associate Editors

Term ending December 31, 1937	Term ending December 31, 1939	Term ending December 31, 1941
K. K. DARROW	SAUL DUSHMAN	W. G. CADY
I. C. GARDNER	K. S. GIBSON	E. O. HULBURT
G. R. HARRISON	L. O. GRONDAHL	H. E. IVES
L. A. JONES	P. E. KLOPSTEG	D. B. JUDD
L. W. MCKEEHAN	W. B. RAYTON	LEIGH PAGE
J. P. C. SOUTHALL	H. B. WILLIAMS	A. H. PFUND

THE JOURNAL OF THE OPTICAL SOCIETY OF AMERICA is the official organ of the Society, and is devoted to original papers on experimental, theoretical and applied optics, in all its branches, including research, instruction, manufacture and design of optical instruments, as well as physiological and medical optics. It is published monthly by the American Institute of Physics Incorporated for, and under the editorial management and control of, the Optical Society of America.

NOTICE FOR CONTRIBUTORS

Manuscripts for publication should be sent to F. K. Richtmyer, Cornell University, Ithaca, New York. Papers are published in English only. To be acceptable for publication manuscript should be original typewritten copy (not carbon copy) either double or triple spaced, with wide margins. References should appear as footnotes only and should be numbered consecutively to avoid repetition. References should include author's name, journal, volume number, page number and year and should be listed in the order given here. Attention should be given to captions for tables and legends for figures. These in all cases should be complete in themselves so as to make the data intelligible to the reader without consulting the text of the article.

Special care should be given to mathematical expressions. The very simplest formulas only should be typewritten and all others carefully written in with pen and ink. Fractional exponents should be used to avoid root signs everywhere. Extra symbols should be used to avoid complicated exponents. The solidus (/) should be used wherever possible for fractions.

All illustrations should accompany manuscript and should always be referred to in the text. Line drawings must be made with India ink on plain white paper or on tracing cloth. Coordinate paper is not desirable, but if used must be blue-lined with all coordinates to be reproduced drawn with India ink. Lettering should be of sufficient size to be legible after reduction.

Proof and all correspondence concerning papers in the process of publication should be addressed to the Publications Manager, American Institute of Physics, 175 Fifth Avenue, New York, New York.

A portion of the cost of publishing the results of research must be regarded as an integral part of the cost of the research. In keeping with the policy which is effective for the Institute's publications a bill for $3.00 per page will be sent to the authors of papers appearing in this journal. It is intended that the authors shall present these bills for payment to the institutions which have supported their researches. If the institution is unable to make payment the bills are to be returned to the Publications Manager marked "No funds available." One hundred reprints without covers will be furnished free. If additional reprints are desired that fact should be indicated on the proper blank sent out with galley proof. The price scale is indicated thereon.

SUBSCRIPTIONS

Subscription price: United States and Possessions and Canada—$6.00; Foreign—$6.60. (Remittances from foreign countries must be in U. S. currency, or the equivalent on basis of current rate of exchange.)

Subscriptions, renewals and orders for back numbers should be addressed to Prince and Lemon Streets, Lancaster, Pennsylvania, or to the American Institute of Physics, 175 Fifth Avenue, New York.

The Journal of the Optical Society of America is published monthly at Prince and Lemon Streets, Lancaster, Pennsylvania.

Entered as second-class matter at the Post Office at Lancaster, Pennsylvania, under the Act of March 3, 1897. Acceptance for mailing at special rate of postage provided for in the Act of February 28, 1925, embodied in paragraph 4, section 412, P. L. and R., authorized June 19, 1925.

THE OPTICAL SOCIETY OF AMERICA

OFFICERS OF THE SOCIETY

A. C. HARDY, *President*
Massachusetts Institute of Technology
Cambridge, Massachusetts

R. C. GIBBS, *Vice President*
Department of Physics
Cornell University
Ithaca, New York

L. B. TUCKERMAN, *Secretary*
Bureau of Standards
Washington, D. C.

HENRY F. KURTZ, *Treasurer*
Bausch & Lomb Optical Company
Rochester, New York

The Board of Directors consists of the above officers; the Editor of the Journal; the Past President; and five elected members.

W. B. RAYTON, *Past President*
Bausch & Lomb Optical Company
Rochester, New York

F. K. RICHTMYER, *Editor*
Cornell University
Ithaca, New York

Elected Members

ARTHUR H. COMPTON
Ryerson Physical Laboratory
University of Chicago
Chicago, Illinois

K. S. GIBSON
Bureau of Standards
Washington, D. C.

G. R. HARRISON
Department of Physics
Massachusetts Institute of Technology
Cambridge, Massachusetts

HERBERT E. IVES
463 West Street
New York, New York

CARL W. KEUFFEL
Keuffel & Esser Company
Hoboken, New Jersey

ROCHESTER, NEW YORK SECTION OF THE OPTICAL SOCIETY OF AMERICA

L. A. DUBRIDGE, *President*
F. M. E. HOLMES, *Secretary*

B. NOYES, *Vice President*
C. A. MORRISON, *Treasurer*

Councilors: F. E. ALTMAN, F. C. FAIRBANKS, L. V. FOSTER, O. SANDVIK, C. C. NITCHIE (*ex-officio*)

THE OPTICAL SOCIETY OF AMERICA was organized in 1916 "*to increase and diffuse the knowledge of optics in all its branches, pure and applied, to promote the mutual interests of investigators of optical problems, of designers, manufacturers and users of optical instruments and apparatus of all kinds and to encourage cooperation among them.*" It aims to serve the interests of all who are engaged in any branch of optics from fundamental research to the manufacture of optical goods.

MEMBERSHIP

Regular Members: "Any person who has contributed materially to the advancement of optics is eligible for regular membership."

Associate Members: "Any person who is interested in optics is eligible for associate membership."

Corporate Members: "Any corporation desirous of encouraging the work of the Society is eligible for corporation membership."

The Society cordially invites to membership all who are interested in any branch of optics, either in research, in instruction, in optical or illuminating engineering, in the manufacture and distribution of optical goods of all kinds or in physiological and medical optics.

ANNUAL DUES

Regular members, $7.50; Associate members, $5.00; Corporate members, $50.00. These dues include subscription to the Society's official journal, the *Journal of the Optical Society of America.*

MEETINGS

The Society holds two meetings per year: An annual meeting in the autumn and a midwinter meeting jointly with the American Physical Society.

For further information concerning the Optical Society of America address the Secretary, Dr. L. B. Tuckerman, National Bureau of Standards, Washington, D. C.

GOVERNING BOARD

For The American Physical Society:

JOHN T. TATE, *Chairman*
University of Minnesota

GEORGE B. PEGRAM, *Secretary*
Columbia University

KARL T. COMPTON
Massachusetts Institute of Technology

For The Optical Society of America:

E. C. CRITTENDEN
National Bureau of Standards

W. B. RAYTON
Bausch & Lomb Optical Company

F. K. RICHTMYER
Cornell University

For The Acoustical Society of America:

HARVEY FLETCHER
Bell Telephone Laboratories

VERN O. KNUDSEN
University of California at Los Angeles

WALLACE WATERFALL
The Celotex Corporation

For The Society of Rheology:

E. C. BINGHAM
Lafayette College

MELVIN MOONEY
United States Rubber Products, Inc.

R. L. PEEK, JR.
Bell Telephone Laboratories

For The American Association of Physics Teachers:

HOMER L. DODGE
University of Oklahoma

PAUL E. KLOPSTEG
Central Scientific Company

FREDERIC PALMER, JR.
Haverford College

The American Institute of Physics is a membership corporation of which five societies are the founding members. These five societies are the principal national societies devoted to pure and applied physics in America. Their names, and those of their representatives who form the Governing Board of the Institute, are given above. The principal work of the Institute is the publication of journals sponsored by the societies or by itself. The names and the editors of the journals are also listed above.

The broad purpose of the Institute is to represent, in all matters of wide or common interest, the five thousand or more members and subscribers associated with the Founder Societies and the journals. It aims to advance the science and profession of physics, and to promote cooperation between pure research, the applied sciences and the industries. To achieve these aims, it is greatly in need of an endowment and is empowered by law to administer grants and funds of any kind.

CONTENTS—VOLUME 26

JANUARY, 1936

Theory of the Multiple Diffraction Grating . . . . . NORMAN HILBERRY 1
Summation of Different Color Radiations by a Photographic Emulsion . . . J. H. WEBB 12
Refraction of Tempered Plate Glass . . . JOHN J. HOPFIELD AND GEORGE B. WATKINS 24
Pressure Effect on Sensitivity of Different Photographic Films. NY TSI-ZÉ AND LÜ TA-YUAN 26
Effect of Oxygen Upon the Photoelectric Thresholds of Metals. . . . . H. C. RENTSCHLER AND D. E. HENRY 30
Simplified Theory of the Image Errors According to L. Seidel . . . . M. HERZBERGER 35
Theory of Microscope Vision. . . . . .M. HERZBERGER 52
Method for Making and Testing Quarter-Wave Plates . . . . .RICHARD M. EMBERSON 63
Instrument for the Measurement of the Graininess of Photographic Materials .E. M. LOWRY 65
On a Method of Decreasing the Reflection from Nonmetallic Substances . . JOHN STRONG 73
Necrology 75

FEBRUARY, 1936

Spectrum of Rubidium in the Mercury Arc . . . . I. A. BALINKIN AND D. A. WELLS 77
Low Voltage Source of Ultraviolet Continuum. . . A. E. SMITH AND R. DUDLEY FOWLER 79
Application of Punched Card Equipment to the Analysis of Complex Spectra. . . . . .J. V. ATANASOFF AND A. E. BRANDT 83
Extension of the Domain of Validity of the General Formula for Oblique Deviation. . . . . HORACE S. UHLER 89
Hydrogen Effect in Certain Oxides. . . . . .E. L. NICHOLS AND C. L. STANFORD 91

MARCH, 1936

Monochromator for the Near Ultraviolet . . . . . FRANK BENFORD 99
Validity of the Photographic Reciprocity Law for Alpha-Rays. R. N. WOLFE AND T. R. WILKINS 105
Reflection and Absorption of Daylight at the Surface of the Ocean. . . . . WILSON M. POWELL AND GEORGE L. CLARKE 111
On the Refractive Index Changes in Optical Glass Occasioned by Chilling and Tempering. . . . . .F. TWYMAN AND F. SIMEON 121
Optical Constants of Several Metals in Vacuum . . . . . .H. M. O'BRYAN 122
Approximations to the Cartesian Oval . . . . . HORACE S. UHLER 128
Corrigenda to "A Simplified Computation of Cartesian Lens Surfaces". LUDWIK SILBERSTEIN 131
Necrology 132

APRIL, 1936

Wave-Length Identification Lists for the Extreme Ultraviolet . . . . . J. C. BOYCE AND H. A. ROBINSON 133
Behavior of the 4930A Absorption Band of Uranine Solutions Under High Pressure. . . . . WILLIAM JAMES LYONS 144
Spectrometer for Studies at High Pressures . . . . . W. JAMES LYONS AND FRANKLIN E. POINDEXTER 146
Infrared Absorption Spectra of Mixtures of Alcohol and Water. . . . . DUDLEY WILLIAMS, R. D. WEATHERFORD AND E. K. PLYLER 149
On the Figuring and Correcting of Mirrors by Controlled Deposition of Aluminum . . . . . .JOHN STRONG AND E. GAVIOLA 153
On the Quantitative Use of the Foucault Knife-Edge Test . . . . . E. GAVIOLA 163
Objective Measurements of Graininess of Photographic Materials. . . A. VAN KREVELD 170
On the Characteristic Function of Hamilton, the Eiconal of Bruns, and Their Use in Optics . . . . . M. HERZBERGER 177
Applied Electron Optics . . . . . V. K. ZWORYKIN AND G. A. MORTON 181
Gloss Investigations Using Reflected Images of a Target Pattern . . .RICHARD S. HUNTER 190
Erratum: Theory of Microscope Vision. . . . . .M. HERZBERGER 196

MAY, 1936

New Theory of Optical Image Formation . . . . . M. HERZBERGER 197
Interesting Optical Law . . . . . M. HERZBERGER 205
Optics of Nerve Myelin . . . . . RICHARD S. BEAR AND FRANCIS O. SCHMITT 206
Vacuum Cell Luminescence Microscope and Its Use in the Study of Luminescent Materials . . . . . JOHN GALLUP 213
Sextant with Improved Filters . . . . . E. O. HULBURT 216
Photographic Penetration of Haze . . . . . NORA M. MOHLER 219
Proceedings of the Twentieth Annual Meeting of the Optical Society of America, Philadelphia, Pennsylvania, October 24–26, 1935 221

JUNE, 1936

Polarizing Characteristics of Polaroid Plates for Wave-Lengths 4000A to 20,000A . . . . . L. R. INGERSOLL, J. G. WINANS AND E. H. KRAUSE 233
Quantitative Study of the Improvement of Speculum Gratings by the Application of Aluminum . . . . . ALFRED B. FOCKE 235
Optical Constants of Potassium . . . . . HERBERT E. IVES AND H. B. BRIGGS 238
Calculated and Experimental Photoelectric Emission from Thin Films of Potassium. . . . . HERBERT E. IVES AND H. B. BRIGGS 247
Measurement of the Aberrations of a Microscope Objective . . . . . R. KINGSLAKE 251
Scattering of Daylight in the Sea . . . . C. L. UTTERBACK AND WILHELM JORGENSEN 257
Portable Blocking-Layer Photo-Cell Pyrometer . . . . . GROVER F. HUBING 260
New Type of Interferometer . . . . . A. HOYT 262
Multiple Sets of Fringes in the Michelson Interferometer . . . . . I. WALERSTEIN AND R. A. WOODSON 267
Intensity, Area, and Distance of Visual Stimulus. A Correction. . . . . ELLIS FREEMAN 271
Effect of Length of Exposure of the Test Object on Visual Acuity. A Correction. . . . . C. E. FERREE AND G. RAND 272

JULY, 1936

Fuertes Observatory Ultraviolet Stellar Spectrograph . . . . . R. WILLIAM SHAW 273
Hyperfine Structure Spectrograph . . . . . L. P. GRANATH AND R. K. STRANATHAN 279
Recording Physical Densitometer . . . . . CLIFTON TUTTLE 282
Selection of Color Temperature Altering Filters . . . . . ROGER S. ESTEY 293
Annual Report of the Secretary of O. S. A. for 1935 298
Financial Statement of O. S. A. for 1935 300
Proceedings of the New York Meeting of the Optical Society of America, February 21–22, 1936 302
Minutes of the Seventh Meeting of the Directors of the Optical Society of America, Incorporated, February 21, 1936 302
Abstracts of the New York Meeting 304

AUGUST, 1936

Ultraviolet Wave-Length Standards of N, C, and O, λ2300 to λ1080 . . . . . ROBERT L. WEBER AND WILLIAM W. WATSON 307
Photographic Effectiveness of the Radiation from a Number of Photographic Sources . . . . . W. E. FORSYTHE AND MISS M. A. EASLEY 310
Spectral Radiant Intensities of Some Tungsten Filament Incandescent Lamps . . . . . B. T. BARNES AND W. E. FORSYTHE 313
Fluorescence of Rhodamine . . . . . GORTON R. FONDA 316
Correction of Aniseikonia with Ophthalmic Lenses . . . . . KENNETH N. OGLE 323

SEPTEMBER, 1936

Important Notice iv
Calculation of Filters for Color Temperature Conversion. . . . . K. S. WEAVER 339
Diffraction Grating at Grazing Incidence . . . . . LUIS W. ALVAREZ 343
Photographic Intermittency Effect in the Region of Extremely Short Flash Periods J. H. WEBB 347
First-Order Laws in Asymmetrical Optical Systems. Part I. The Image of a Given Congruence: Fundamental Conceptions . . . . . M. HERZBERGER 354
Verification of the Huygens Wave Surfaces in Uniaxial Crystals . . . . . WINTHROP R. WRIGHT AND MILAN W. GARRETT 360
Measurement of Small Retardations with the Polarizing Microscope . . . . . RICHARD S. BEAR AND FRANCIS O. SCHMITT 363

OCTOBER, 1936

Separation of Close Spectral Lines by the Method of Anomalous Dispersion. F. T. HOLMES 365
Photographic Latent Image Considered from the Standpoint of the Quantum Mechanics Model of Crystals . . . . . J. H. WEBB 367
Low Intensity Solarization for Four Emulsions . . . . . HENRY P. GRIGGS 384
Photovoltaic Cell Reflection Densitometer. . NORA M. MOHLER AND DELIA ANN TAYLOR 386

NOVEMBER, 1936

First-Order Laws in Asymmetrical Optical Systems. II. The Image Congruences Belonging to the Rays Emerging from a Point in Object and Image Space; Fundamental Forms . . . . . M. HERZBERGER 389
Effect of Pre-Exposure in Spectrum Photography. . . . . DANIEL NORMAN 407
Changes in Color Temperature of Tungsten-Filament Lamps at Constant Voltage . . . . . DEANE B. JUDD 409
Estimation of Chromaticity Differences and Nearest Color Temperature on the Standard 1931 ICI Colorimetric Coordinate System . . . . . DEANE B. JUDD 421

DECEMBER, 1936

Subscriptions to *The Review of Scientific Instruments* . . . . . A. C. HARDY 427
Filters for the Infrared . . . . . R. BOWLING BARNES AND LYMAN G. BONNER 428
Transmissions of Powder Films to the Infrared Spectrum . . . . . JESSE H. PLUMMER 434
Electric Welsbach Lamp . . . . . A. H. PFUND 439
Polarimetric Determination of Optical Properties. . . . . RICHARD M. EMBERSON 443
Simple Azimuth and Phase Half-Shade of Varable Sensitivity . . . . . C. V. KENT 450
Polaroid Half-Shade Analyzer . . . . . A. H. PFUND 453
Author Index to Volume 26 454
Analytic Subject Index to Volume 26 457
